About Us

Our company, Dylan Biotech India Private Limited, is a multifaceted company that manufactures and exports Personal Care and FMCG Products. The offered personal care products are the exclusive focus of our website. Kindly visit www.ameraxpress.com to browse FMCG and personal care products. We now manufacture perfumes, attars, and different aromas under the Arome India brand in the cosmetic (personal care) industry. Top Notes are available in our fragrances, such as citrus and lavender. In addition to this, lemon, bergamot and orange are among the citrus notes in our products, as are subtle floral notes like rose and lavender. As top notes, anise and basil are used.

Heart Notes like jasmine and cinnamon alongside aromatic flower oils such as Jasmine, Neroli, ylang-ylang, cinnamon, Geranium, pine, pepper, black pepper, cardamom and lemongrass make up the heart notes. The longest-lasting aroma is from the base notes, which sustain the lighter ones such as vanilla, sandalwood, and musk. Most of the time, we possess Base Note Fragrances that endure for 9+ hours. The base notes are quite thick, hefty, and linger for a long time. The perfume of base notes remains the longest since they seep into the skin of users. Vanilla, musk, amber, moss, woody, and patchouli notes like Cedarwood and sandalwood are common base notes.

Key Facts
